SUMMARY

Results-oriented Full Stack Developer with expertise in front-end technologies (HTML, CSS, JavaScript, React) and back-end development (Node.js, Python). Develops responsive web applications with secure authentication and API integrations. Committed to writing clean, maintainable code and leveraging AI tools to enhance workflows and user experiences.

SKILLS

- **Frontend:** HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, GSAP, React.js, TypeScript, Next.js, Framer Motion, DaisyUI, Intersection Observer API, Responsive UI/UX, Animation & Component Architecture
- **Backend:** Node.js, Express.js, Python, Java, C++, REST APIs, JWT Authentication, Socket.io (Real-time Communication), API Rate Limiting (Arcjet), Resend (Email Automation), Cloudinary (Media Uploads)
- **Database & DevOps:** MongoDB, Mongoose, Firebase, Git/GitHub, CI/CD Basics, Deployments (Vercel, Sevalia, Render, Netflix)
- **AI Tools:** Prompt Engineering, OpenAI APIs, LLM Evaluation, Chatbot Development, AI Feature Integration, Light Model Fine-tuning
- **System Design:** Scalable Architecture, State Management (Zustand), Performance Optimization, Lazy Loading, Code Splitting, Real-time App Design
- **Soft Skills:** Collaboration, Agile Development, Critical Thinking, Problem Solving, Time Management, Communication, Requirement Analysis

EXPERIENCE

Full Stack Developer Intern, ModelSuite AI July 2026–September 2026 | Remote

- Enhanced application features with React, Node.js, Express.js, and MongoDB and improved overall user experience.
- Implemented UI improvements, resolved bugs, and developed new functionalities to elevate application performance.
- Developed modelsuite.ai talent portal to streamline user engagement and application processes.

AI Prompt Engineer, Soul AI January 2025–August 2025 | Remote

- Designing and optimizing AI prompts for diverse generative use cases, boosting output relevance by 40%.
- Conducted prompt iteration and evaluation for accuracy, safety, and contextual alignment, ensuring high-quality AI interactions.
- Collaborated with cross-functional teams to deploy AI-powered features, enhancing user experience in real-world applications.

AI Prompt Engineer, Outlier AI October 2024–March 2025 | Remote

- Created reusable prompt templates for intelligent educational tools and LLM-based tutors, enhancing user engagement.
- Conducted systematic testing and refinement of prompts to boost instructional effectiveness.
- Executed data-aware prompt strategies to support automation initiatives.

EDUCATION

Bachelor of Science

Computer Science, Rizvi College of Arts, Science And Commerce, Mumbai (2026)

CGPA: 8.58

Higher Secondary Certificate (HSC)

Science, Wonderland High School And Junior College, Nashik (2023)

Percentage: 56%

Secondary School Certificate (SSC)

Holy Family Convent High School, Nashik (2021)

Percentage: 81%

PROJECTS

Crown Construction Website - *crownconstruction.in*

- Built a responsive, animation-rich website for showcasing construction services.
- Utilized React, TypeScript, Tailwind CSS, and Framer Motion.
- Integrated 3D hero animations and scroll-triggered storytelling with the Intersection Observer API.
- Optimized performance with lazy loading and implemented reusable UI components for a premium user experience.

Botilla Chat App Website - *botilla-stfes.sevalla.app*

- Developed a real-time chat application using React, Tailwind, Node.js, Express, and Socket.io.
- Implemented custom JWT authentication, real-time messaging, user presence tracking, typing indicators, and Cloudinary-based image uploads.
- Added rate limiting with Arcjet, automated welcome emails via Resend, and optimized message rendering for smooth, responsive performance across devices.
